

NEED STORAGE
IN HOMER FIELD

Shreveport, La., March 8.—The northwest extension of the Homer field has been extended a short distance by the completion of a 2000 barrel shallow well of Glassett and Merz in the southwest quarter of section 12-21-8. It is the company's No. 2 on the Jackson tract and is producing from the sand found at 1215 feet. There are two shallow wells on this tract which are making an average production of 25 barrels a day.

The question of greatest importance in the Homer district at the present time is the necessity of more storage and pipe line facilities. The White Oil corporation, the Standard Oil Company, the Gulf Oil Company, the Louisiana Oil Refining Corporation are doing everything in their power to cope with the situation. Storage for 15,000,000 barrels of crude oil, valued at \$11,000,000 is being provided for at the present time. The above mentioned companies have already erected 35 storage tanks of 45,000 barrel capacity each on their tank farms in the vicinity of Homer and Biber.

The Standard Oil company has 30 tanks, six miles north of Magway and is making arrangements to erect at least 10 more, ranging from 27,500 to 45,000 barrel capacity each.

The Gulf company has completed six new tanks for its farm near Dublin. Six others are under construction. At Minden the Texas company has three tanks completed and the Arkansas Natural Gas company has six completed at its farm north of Minden. Construction of 23 others will begin at once.

Sipe Springs
Holds Interest
Of Operators

Eastland, Tex., March 8.—Oil men in Eastland are now most interested in the possibilities of the connection of the Sipe Springs and Rising Star oil fields. For some time the trend of production out of Dedemans has been southwestward and at the same time the Sipe Springs and Rising Star production has been moving westward. According to many Eastland operators, it is only a matter of time until good wells will be brought in close enough together to join the two pools in much the same manner that the Munger-Bastland pools are connected.

Both towns are well located and operations are going on in every direction from each. The question is, which town, where the fields are connected, will be the center of activities in that district.

It is a known fact that Sipe Springs is the center of a larger field. On the south in the shallow fields, where more than 25 wells are producing from 20 to 35 barrels daily. The extent of this shallow district has not been determined, but it is believed to be extensive. On the north and west are deep wells, which have proved good producers.

Rising Star has not yet been proved to lie in the center of production, although it is believed that it does. Rising Star came into prominence as a result of the discovery of the Hiltburn well a short time ago. But this well is some miles away and a new well at Center is to be opened in that district.

GEOLOGIST INVESTIGATES PROSPECT AT BIG SPRING

Big Spring, Texas, March 8.—H. J. Hurd, a geologist of Tucson, Arizona, is investigating the possibilities of oil prospects in the vicinity of Big Spring.

DODSON KILLING
USE OF CALOMEL

Says Drug is Mercury and Acts Like Dynamite on Your Liver.

Dodson is making a hard fight against calomel in the South. Every druggist has noticed a great falling off in the sale of calomel. They all give the same reason. Dodson's Liver Tonic is taking its place.

"Calomel is dangerous and people know it," says Dodson's Liver Tonic is perfectly safe and gives better results," said a prominent local druggist.

Dodson's Liver Tonic is personally guaranteed by every druggist. A large bottle costs but a few cents, and if it fails to give more relief in every case of liver sluggishness and constipation, you have only to ask for your money back.

Dodson's Liver Tonic is a pleasant-tasting, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose a day's work! Take Dodson's Liver Tonic instead and feel fine, full of vigor and ambition.—Adv.

OIL STANDS IN
GILLILAND WELL

Wichita Falls, Texas, March 8.—The hundred feet of oil in standing in the Gilliland Oil company's test in section 14, township 16 north, range 10 east of the Kemp-Munger-Allen field, in Archer county, the drill is one foot in the sand which was picked up at 180 feet. No appearance of salt water has been seen. This is considered a favorable sign and makes the test one of the most interesting since the bringing in of the Kemp-Munger-Allen discovery well some months ago. The casing is being set above the sand. The well will be completed as soon as possible.

Another interesting operation in this district is the No. 2 Munger of the Kemp-Munger-Allen interests. This well was picked up at 175 feet. The depth of the well made an excellent showing. The well will be completed as soon as the cement is set.

The Manhattan Production company's test in the Wichita valley farm lands is showing considerable oil although there is much salt water in the hole. The drillers believe that the water is coming through a leak in the casing. A packer will be set at once.

The No. 2 Roberts of the Woodburn Oil corporation, 1800 feet east of the General Oil company's well in the Red river pool is creating much excitement as it virtually completed itself before the drillers were ready for it. The well is standing with 1800 feet of oil in the hole.

ROLLEMAN FIELD EXTENDED
BY NEW SINCLAIR WELL

Eastland, Texas, March 8.—The Rolleman shallow field has been extended one mile to the east by the Sinclair Consolidated Energy No. 1, which at a depth of 1875 feet is making 800 barrels of oil daily.

The new well is only a short distance from the States Oil corporation's No. 1 C. Harrell gas well. The Rolleman field is situated about eight miles north of Eastland.

In the western part of the same pool, the States Oil corporation's No. 2 and No. 1 Loper, No. 1 Nix and Shaban No. 1 are expected to be completed within the next few days. It is already known that these wells are producers.

Jacob Lyerla's well of the Arkansas Natural Gas company, 1800 feet northwest of the company's Correll No. 2 is producing 60 barrels through a gas trap. Because of the heavy gas pressure drilling has been discontinued.

FISH FOR LOST TOOLS FOR
MONTH IN JIM NED WELL

Coleman, Texas, March 8.—For more than a month the drillers at the Jim Ned well have been fishing for three lost strings of tools. One string has just been recovered. The well is down around a depth of 2850 feet with excellent showings of oil. Periodically the well throws oil over the derrick. It is believed that as soon as the remaining two strings are removed the well will be a first class producer. This test is on the Jim Ned ranch, 12 miles northeast of town.

The Morris No. 3, of the Magnolia Petroleum company, has reached a producing sand at between 2300 and 2400 feet. No estimate of the well's production has been made.

El Paso Seed Co.'s 1932 Catalog now ready. Write or call for a copy.—Adv.

Oil Operators
Watch Drilling
In Caddo Region

Caddo, Tex., March 8.—Operation in this district are attracting considerable attention at the present. One of the best completions of the week is the 1800 barrel well of the Texas Pacific Coal and Oil company, on the Caddo Stephens grant, the largest tract of land in the county. The well is on the tract, it came in making five barrels over the derrick by lunch hour and then settled down to a steady flow. This well is creating much excitement. It opens up new territory in that direction.

Coming in with an initial production of 900 barrels, the Montreal company's Harris No. 1, located three and one-fourth miles southwest of Caddo, Stephens grant, is the biggest completion of the district during the past ten days. The drill is only five feet in the line formation. The well is holding up to its original production. One mile northeast of this well is the Texas-Petroleum company's No. 1 on the Harris tract is 60 feet in the line.

MUCH ACTION IN WICHITA
DURING LAST TEN DAYS

Wichita Falls, Texas, March 8.—The past ten days have been busy ones in the Wichita oil fields, especially in block 74, Burkhardt, where several large producers were completed. In this block Long, Taylor and Owen are the first three wells of the week in the northwest Burkhardt pool. It is the company's Vogel No. 2, which is making 120 barrels. In this same block the No. 4 Vogel of the Contractors Oil company is making 100 barrels. E-M-P Oil company's No. 2, block 74, is making 250 barrels.

In the Kemp-Munger-Allen district, the Black Diamond well of the Texas O-Wax company is standing and producing. The best showings for producers in that field have been encountered in this test according to the reports of those who have visited the site. In the same district the Black Diamond well of the Texas O-Wax company is standing and will be completed at once.

PRODUCERS EXPECT TO GET
FIVE BIG WELLS VERY SOON

Producers have two wells on the sand and three more which are expected to come in at any moment. Tom Owen, the first well according to the reports of those who have visited the site. In the same district the Black Diamond well of the Texas O-Wax company is standing and will be completed at once.

Impossible for me to come to El Paso. Our Louisiana wells calling for my immediate attention. Culbertson county acreage has doubled in value last week. Several wells near producers acreage, progressing nicely.

NEW PIPE LINE OF WHITE
CORPORATION RUNNING OIL

Shreveport, La., March 8.—The new six inch pipe line of the White Oil corporation from the company's tank farm at Homer to the Homer field, has a daily capacity of 15,000 barrels and has a gathering system of 35 miles. The company's farm has six 5000 barrel steel storage tanks completed. It is the company's purpose to have 25 when its full program of construction is completed.

The 22 car loading racks of the tank farm have been completed.

ABANDONED SHIP LOCATED
15 MILES OFF NANTUCKET

Boston, Mass., March 8.—The shipwrecked board steamer Guilford, abandoned in a sinking condition yesterday about 15 miles off Nantucket shoals was located today by a coast guard cutter. A wireless message said it appeared possible to beach the Guilford within a few hours.

The Guilford was bound from Norfolk for Boston.

TWO DIE IN SNOW SLIDE

East Lake City, March 8.—Harry Gardner, superintendent of the Woodlawn Copper company, and Fred Hanson, miner, were killed Saturday in Cottonwood Canyon north of here in a snow slide, according to word received here.

GOVERNOR PARDONS MONTUOYA.

Santa Fe, N. M., March 8.—Belisario Montuoya, of Wagon Mound, has been pardoned by Gov. Larrazolo after having served one month and nine days of a 60-day sentence in the state prison on charges of carrying concealed weapons.

A RAW, SORE THROAT
Eases Quickly When You
Apply a Little Mustrerol

And Mustrerol won't blister like the old-fashioned mustard plaster. Just spread it on with your fingers. It penetrates to the sore spot with a gentle tingle, loosens the congestion and draws out the soreness and pain. Mustrerol is a clean, white ointment made with oil of mustard. It is for a quick relief from sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frost-bite, colds on the chest. Nothing like Mustrerol for croupy children. Keep it handy for instant use. 50c and 80c jars; hospital size \$2.50.

LOUISIANA OIL
OUTPUT SOARS

Shreveport, La., March 8.—North Louisiana fields during the seven days past produced an average of 112,700 barrels of oil daily. The Calhoun field for the period in pipe line runs yielded 75,000 barrels per day. Red River parish produced 12,800 barrels per day.

GOOD SHOWING OF OIL
FOUND NEAR GRAHAM, TEX.

Graham, Texas, March 8.—A good showing for a well has been found southwest of Graham in the Ray Colwell well on the Williams Johnson survey. The showing was picked up at 1850 feet and the well was shut down for orders at once. This test, nine miles southwest of Graham, is only two miles northeast of the Roxana Petroleum company's Donnell No. 1, which came in several months ago, discovering a new sand at 1870 feet. Operators who have visited the new well say that the sand is the same as that found in the Donnell well.

TITAN COMPANY EXTENDS
BORDERS OF KEYS FIELD

Tulsa, Okla., March 8.—The Keys field has been extended to the north by the blowing in of the Titan Oil company's 1200 barrel test in section 16-9r. The well came in blowing the tools from the hole and throwing mud over the derrick. It is believed that the well will be one of the best in the field when completed. This well brings the line of production nearer to Lawton.

Roofing material and cigarette wrappers are made from the palm in Mexico.

CALOTABS ARE
BEST FOR COLDS
AND INFLUENZA

Doctors Now Prescribe Calotabs, the Purified Calomel Tablets That Are Nauseless, Safe and Sure.

Doctors are warning the public that simple colds and mild cases of influenza often lead to pneumonia and other serious complications. They say that every cold should receive immediate attention and that the first step in the treatment is to make sure that the liver is active. For this purpose Calotabs, the perfected, nauseless calomel tablets are the surest, best and most agreeable laxative.

One Calotab at bed time with a swallow of water—that's all, no salts, no nausea, and no upsetting of the digestion and appetite. All morning your cold has vanished, your liver is active, your system is purified and refreshed and you are feeling fine with a hearty appetite for breakfast. Eat what you please—no danger.

For your protection, Calotabs are sold only in original sealed packages, price thirty-five cents. All druggists recommend and guarantee Calotabs and are authorized to refund the price if you are not delighted with them.—Adv.

PALO PINTO COUNTY HITS
OIL IN SHALLOW AREA

Shawnee, Texas, March 8.—The Stuart shallow field, northwest of here in Palo Pinto county has another producer. It is the No. 2 of the Stuart Petroleum syndicate, which has been playing in luck during the past several weeks of its development in this district. The No. 2 came in at 1100 feet making 300 barrels. The new well is situated one location west and two south of the No. 2. The Stuart and Pacific well, which came in a week ago making 800 barrels at 1100 feet.

Kodak Finishing See Gandara—Adv.

ATLANTIC PETROLEUM CO.
MAKING 1600 BARRELS DAILY

Tulsa, Okla., March 8.—The most important developments in the Oklahoma fields during the past 10 days have been in the Deep sand district of Oklahoma county. In the Wilcox district of this county the Atlantic Petroleum company's No. 1 Bearhead is making a daily production of 1600 barrels from the Clinton sand encountered at a depth of 2855 feet. The drill is 24 feet in the sand and will drill through it. When the bit was 10 feet in the sand the well made 1000 barrels. At this rate of increase the drillers estimate that when the well is completed it will make around 2000 barrels.

WHO ARE THE
"INSIDERS" OF PRODUCERS?

A FAIR QUESTION with a PLAIN ANSWER. THERE ARE NO INSIDERS! There are no ADVANCE PROFIT TAKERS. There are NO UNSEEN INFLUENCES. There are no SALARIES paid to officers and none will be paid until ACTUAL PRODUCTION warrants it. PRODUCERS' has no connection DIRECT or INDIRECT with ANY OTHER OIL COMPANY.

The ONLY officers of PRODUCERS' are those whose names have already been published. W. C. BEST is PRESIDENT, TOM OWENS is 1st Vice President, S. W. MANNING is 2nd Vice President and R. H. MANNING is Sec'y-Treasurer.

Looking at PRODUCERS' from EVERY ANGLE you are forced to the conclusion that it is BIGGER and BETTER.

Bigger in its PLANS. BIGGER in its PREPARATION. BIGGER in its broad PROGRAM. A year of "getting ready" and weeks of ACTUAL DRILLING preceded the first offering of its SHARES to the PUBLIC at \$1 PAR. ACTUAL PRODUCTION is secured EARLY—our well on tract No. 18 being reported IN last

Friday. Another well should be in SOON and FIVE OTHER WELLS will be SPURRED IN SHORTLY.

With things like this in its favor, do you WONDER that PRODUCERS' shares are being bought EAGERLY.

With such PRACTICAL MANAGEMENT—with such WONDERFUL ACREAGE—with such a BRILLIANT FUTURE in SIGHT, do you wonder that orders for SHARES grow LARGER and more NUMEROUS with each PASSING DAY. IF PRODUCERS, with all the SPLENDID FEATURES it OFFERS YOU, appeals to you as the KIND of COMPANY you've HOPED FOR, SEND YOUR ORDER FOR SHARES at \$1 PAR—DIRECT OR TO YOUR BROKER.
